

VISOR MITTEN

What: The 'Visor Mitten' is a device accessory that fits over the visor (sunguard) of a small AAC device. The one shown in the photo was made for a Vantage or Springboard communication device. Because it is made of Velcro™-sensitive fabric, symbol cards can be affixed to the mitten.

Why: Designed to maximize language and literacy support for device users. Attach 'cheat' sheets to the mitten, to support students (and facilitators!) in learning and practicing new vocabulary.

**How /
Where:**

Sew your own device mitten, or order one. These hand washable mittens are available in black, white, yellow, red, blue, and pink. They are \$5, including s & h. Send check or money to:
