Dotted Lines in Worksheets:
Tip by Nancy Hogan
Collaborative Center for Assistive Technology and Training

Many of the teachers I work with request worksheets with dotted lines. While I like The ABC Printed lines font that ships with IntelliTalk 2, I didn't like the disjointed look between words, and couldn't figure out how to leave blank spots for the students to write their answers.

If you press the keyboard key [?/], lined blank spaces will appear on the page!

The main characters are _____ and _____.

(This example used Comic Sans and ABC print dotted line).
